Subject: Label Notification(s) for Pesticide Registration Notice 98-10

Dear Mr. Rogosheske:

The Agency is in receipt of your Application(s) for Pesticide Notification under Pesticide Registration Notice PRN 98-10 date July 15, 2014 for the following product(s):

War Paint Insecticidal Paste

EPA Reg. No. 47000-185

The Registration Division (RD) has conducted a review of this request for applicability under PRN 98-10 and finds that the label change(s) requested falls within the scope of PRN 98-10. The label has been date-stamped "Notification" and will be placed in our records.

If you have any questions, please contact Linda A. DeLuise at 703-305-5428.

Sincerely,

A handwritten signature in black ink, appearing to read "Linda A. DeLuise", written over a large, stylized letter "f" that serves as a signature flourish.

Richard J. Gebken
Product Manager
Insecticide Branch

War Paint[®] Insecticidal Paste

Editors Note: Text in Brackets [] indicates alternate or optional wording any or all of which may appear on the final labeling.

For Use Only on Horses

[Kills and Repels Face Flies, Horn Flies, Stable Flies, House Flies, Black Flies, and Bot Flies on Horses and Foals]

[Permethrin]

[Easy to Use]

ACTIVE INGREDIENTS:

*Permethrin.....	7.6%
**Piperonyl butoxide.....	14.0%
***N-Octyl bicycloheptene Dicarboximide	21.0%

OTHER INGREDIENTS.....57.4%

TOTAL.....100%

*Cis/Trans ratio: Min. 35% (+/-) cis and max. 65% (+/-) trans.

**Consists of (butylcarbityl) (6-propylpiperonyl) ether and other related compounds.

***MGK 264

NOTIFICATION

AUG - 4 2014

War Paint[®] is a registered trademark of Chem-Tech, Ltd.

KEEP OUT OF REACH OF CHILDREN CAUTION

FIRST AID

IF IN EYES:	<ul style="list-style-type: none"> Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eyes. Call a poison control center for treatment advice.
IF SWALLOWED:	<ul style="list-style-type: none"> Call a poison control center or doctor immediately for treatment advice. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give any liquid to the person. Do not give anything by mouth to an unconscious person.
IF ON SKIN OR CLOTHING	<ul style="list-style-type: none"> Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

Have the product container or label with you when calling a poison control center or doctor or going for treatment. For 24-hour emergency information on this product, call 1-800-498-5743 (US & Canada) or 1-651-523-0318 (all other areas).

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION

Harmful if swallowed or absorbed through the skin. Avoid contact with skin, eyes or clothing. Do not contaminate food or foodstuff. Wash thoroughly with soap and water after handling.

ENVIRONMENTAL HAZARDS

This product is toxic to fish and other aquatic animals. Do not contaminate any body of water with this product by cleaning of equipment or disposal of wastes.

PHYSICAL OR CHEMICAL HAZARDS

Do not use or store near heat or open flame.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

APPLICATION RESTRICTIONS:

Do not use this product on horses intended for human food. Do not apply to a wet animal since the product will not adhere to moist surfaces. War Paint, once applied to the hair of the horse, cannot be wiped off. Therefore, it should not be used within one to two weeks of an event or show in which the presence of small amounts of War Paint on the horse's coat

would have an adverse effect on the horse's appearance. As with any product certain individual horses may be sensitive to one or more of the ingredients in War Paint. If local irritation should occur, discontinue use. If irritation persists, discontinue use, wash area and consult a veterinarian.

PRODUCT INFORMATION:

It requires very small amounts of War Paint to kill and repel flies. Small amounts of War Paint are placed on the horse only where flies tend to congregate. War Paint [this product], when applied to the horse, attaches to the hair of the horse and slowly releases the insecticide over a period of weeks. Full body fly control does not usually occur until 1 to 2 days after the application. The reason for this is it takes time for the formulation to release the insecticide onto the horse's hair. Because War Paint is not only an insecticide, but also an effective repellent, you will notice that in the case of face fly activity, the repellent activity of the product will be apparent within hours if not immediately after application. After a period of one to two weeks, as the insecticide is released onto the horse's hair, you will find that War Paint becomes powdery and will fall off the horse's hair leaving no adverse effects on the horse's appearance.

Full Body Fly Control:

Adult horses: For the treatment of pastured horses, it is recommended that a full application be applied as a single treatment. This should provide adequate fly control for approximately one week on pastured horses.

Apply one (1) gram under each eye, two (2) grams on withers and two (2) grams on each leg below the hock or knee - 12 grams total as a single treatment. DO NOT REPEAT TREATMENT FOR SEVEN (7) DAYS.

Insert Picture

APPLICATION TECHNIQUES:

FACE FLIES: Turn the applicator wheel until the gel is seen at the top of the applicator then continue turning 1/8 of a turn to place one (1) gram of War Paint on top of the applicator. Then while holding the applicator length wise, apply under the eye along the lower lid, close to the lid margin. Do not apply directly into the eye. Make a 1 inch wide stripe along the entire lower lid from corner to corner. For maximum Face Fly control, it is very important to place the product around the inside corner of the eye where the top and bottom lids meet. This is the area where tearing occurs due to fly irritation and where face flies congregate to feed. Repeat the application to the other eye. A 1 - inch stripe under each eye will apply 2 grams of War Paint to the face.

Insert Picture

HORN FLIES, BLACK FLIES AND HOUSE FLIES: Turn the applicator wheel 1/4 of a turn to place 2 grams of War Paint on the top of the applicator. Then apply a 1 by 4 inch stripe under the horse's mane on the withers. Place the product far enough up the withers so the product will not be under the saddle or blanket if the horse is to be ridden.

STABLE FLIES AND BOT FLIES: Apply a 1 X 4 inch stripe to each leg. Turn the applicator wheel 1/4 turn to place 2 grams of War Paint on the top of the applicator. Then apply the material to the front of the horse's leg four inches below the knee or hock. Touch the applicator to the spot to be treated and move the applicator in the narrow direction up the horse's leg four inches toward the knee or hock. Smooth out the material using the top of the applicator to a 1 inch wide by 4 inch long stripe on each leg.

Insert Picture

BOT FLIES: To kill and repel bot flies during the egg laying season, War Paint should be applied over the bot eggs already on the horse. A four inch by one inch wide strip should be painted over the area where the bot eggs are attached. This should be done instead of applying War Paint to the front of the legs, since this application will also control stable flies and bot flies usually lay their eggs on the sides of the horse's legs.

Insert Picture

FOALS: The same technique for applying War Paint can be used on foals, except only 1/2 of the adult amount should be used - 6 grams total. Since the foal's eyes are smaller than adult horses, a one inch wide stripe under each eye of a foal will apply only 1/2 gram of War Paint under each eye. When applying to the foal's withers and legs, make the application stripe only 1 inch wide by 2 inches long instead of the 4 inch long stripe used on adult horses. This will insure that a foal will receive one-half of the adult horse dose. Remember, a 1/8 turn of the applicator wheel will dispense one gram of War Paint on the top of the applicator.

LOCAL FLY CONTROL: For horses that are to be ridden and handled frequently, lesser amounts of War Paint be applied more frequently are a better choice. Lesser amounts of War Paint applied discreetly and prudently to the horse can provide effective local fly control for several days to a week. If this technique is used, remember not to apply more than 12 grams of War Paint to a horse in any 7 day period. See application technique and illustrations.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

STORAGE: Keep container tightly sealed when not in use. Do not store near food or feed. Avoid temperatures over 100° F.

CONTAINER DISPOSAL: **If Empty:** Do not reuse this container. Place in trash or offer for recycling if available. **If Partly Filled:** Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.
